## Use-Case Specification: View Wiki

### 1. Use-Case View Wiki

#### 1.1 Brief Description

The Use-Case “View Wiki” allows the user to read information of all playable characters. The information is limited but they involve a picture, name, nickname and a short description. The user can scroll down or can search a character.

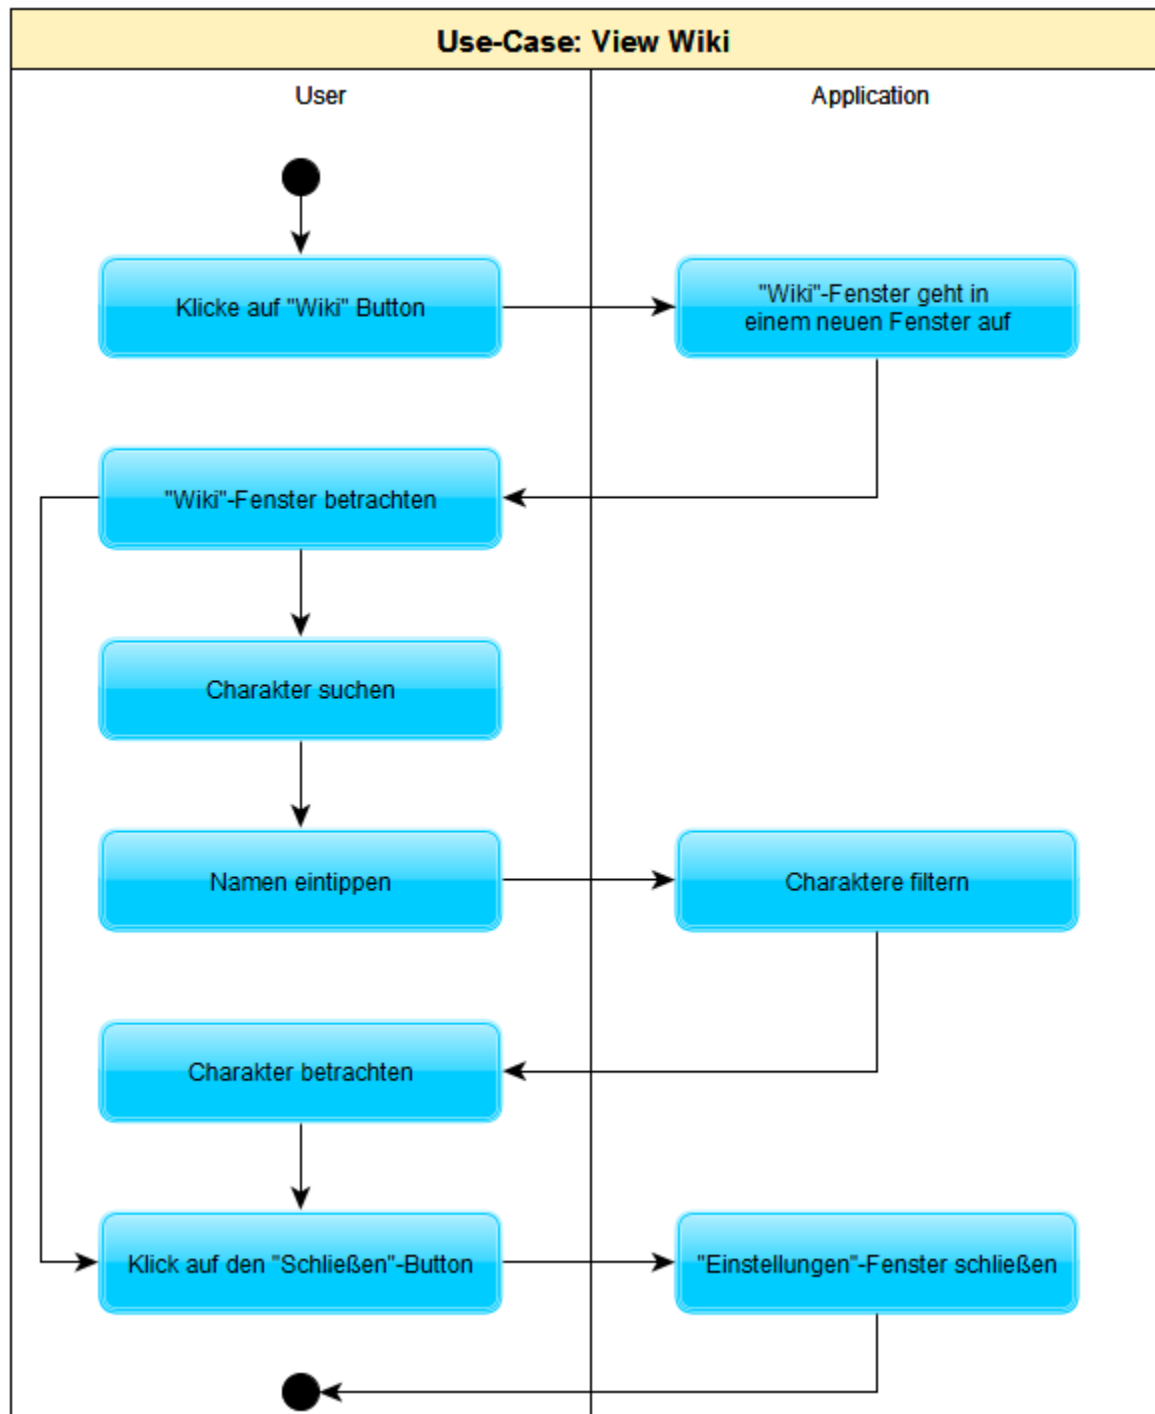

Also this view has a button to add new characters to the game/database  
(UseCase Add Character – tbd. /4. Semester)

Nappy, the ingenious	Version: 1.0
Use-Case Specification: View Wiki	Date: 21/11/15

## 2. Flow of Events

### 2.1 Basic Flow

Nappy, the ingenious	Version: 1.0
Use-Case Specification: View Wiki	Date: 21/11/15

Cucumber is not supported for desktop applications. We are using SikuliX 1.1.0 for our user tests.

## **2.2 Alternative Flows**

### **2.2.1 *Open wiki in the menu***

The user can use the button “Wiki” in the menu “Hilfe”.

## **3. Special Requirements**
